

Use Case #1

Create a Team (Student)

BASIC COURSE:

On the Dashboard page, the Student clicks the User button, and the system displays the User page. The Student clicks the Teams button and the system displays the Teams page. The Student clicks the Create Team button and the system displays a Create Team screen. The Student selects the Sport, enters the Team Name, enters the Description, and clicks the Submit button. The system ensures that a Sport has been selected, the Team Name is not too long or too short, and the Description is not too long. The system then displays a Confirmation screen, and the review is sent to an Admin.

ALTERNATE COURSES:

The student enters a Team Name that is too short(<3 characters): The system shows the Team rejected page showing a message explaining why the Team was rejected, rejects the Team creation, and displays the Dashboard Page again.

The student enters a Team Name that is too long(>30 characters): The system shows the Team rejected page showing a message explaining why the Team was rejected, rejects the Team creation, and displays the Dashboard Page again.

The student did not select a sport: The system shows the Team rejected page showing a message explaining why the Team was rejected, rejects the Team creation, and displays the Dashboard Page again.

The student enters a description that is too long(text>1MB): The system shows the Team rejected page showing a message explaining why the Team was rejected, rejects the Team creation, and displays the Dashboard Page again.
