Invite Player to Team (student)

BASIC COURSE:

On the Dashboard page, the student clicks on *USER* button. The student clicks on the *TEAMS* button. The student clicks on Manage *Team button*. The student clicks on *INVITE PLAYER* button. In the search bar, the student enters an email of a student they are hoping to invite. In the database, the system searches for the email of the profile requested. The system displays the results obtained from the database. When the profile of the fellow student appears in search results, the student clicks on *ADD* button.

ALTERNATE COURSES:

The email searched for fellow student does not appear: The systems will display an error message and redirects the student to the Invite Player page.

Display — Teams Page — click on Manage Team Button — Display — Manage Team Page — click on Invite Player Button — Display — Invite Player Page — Enter Email Address — click on Add Button — Database — Email registered? — No — Player Not Found Error — Error Page — Yes — Display — Confirmation Page — Invoke — Player Invited

click on Teams Button — User Page — Display — click on User Button — Dashboard Page — Admin
